The Tree Climber's Companion, Jeff Jepson

A comprehensive reference work on modern climbing techniques. The book explains methods of ascent, knotting and climbing techniques and various rope-climbing positioning methods. Its wealth of handy hints make it an interesting learning tool and particularly suitable for use by training organisations and schools.

„Knotbook“, Dirk Lingens

Knots have always been an important component of arboriculture. But improved climbing and rigging procedures used by today's modern arborist demand more and more specialized knots. The "Tree Climbers Knot book" includes over 88 pages of colour illustrations on "How to Tie" plus an explanation, uses and positives and negatives of each knot.

PPE verification

Personal protective equipment carries your life. Conform to the regulations of the German institution for accident prevention and insurance in the landscaping industry PPE equipment is required for every type of work at height. The longevity is indicated by the manufacturer but strongly depends on work conditions. In every day work life every user is responsible for the security of his equipment. While the working life of PPE equipment is little regulated the condition of fall protective equipment has to be controlled by a technical expert. Trained by the German institution for accident prevention and insurance DRAYERS specialists dispose about a great level of experience and technical knowledge. You have got several PPE equipment to control? Ask for a quote!

One basic equipment contains: 1 helmet, 2 climbing ropes, 2 lanyards, (with and without Steel core), 6 safety karabiner, 1harness

Consists of: 42 Monkeys, 40 holds Basic + Instinct, 40 screws, 2 belts with ratchet brace: 220 cm, 40 belts with buckle: 220 cm, 1 keys, 2 transport-bags, 1 Manual

MSH 200 823,50 € 979,97 €

Climbing is one of many pedagogic activities. Sporty and playful abilities like: self confidence, confidence in others, bravery, precision are requested. With the help of the monkey sets you can propose a new climbing activity and connect physical skills with environmental awareness. Choose a adapted tree or post in a natural environment, a playground, or in you garden and install the plastic holds with the slings. Vary the distance and the position the of the holds to adapt the difficulty of the climbing route.

Aluminium Box

Tree Care Training Busemann

Tree Care Training and arboricultural education

Successful and sustainable tree surgery requires a willingness to participate in life-long learning. We are responsible for maintaining the ecological, aesthetic and cultural value of our trees and shrubs for generations to come. We use our cross-border contacts to exchange and pass on practical knowledge and theory, thus fostering awareness and a responsible approach to dealing with the tree as a living organism.

We organise individually-tailored courses and further training programmes throughout Europe on the topics of rope climbing techniques and safe tree work. We would be pleased to provide you with further information on our training venues and dates. The training centre is accredited in accordance with the health and safety regulations (VSG 4.2.) of the Gartenbau-Berufsgenossenschaft Kassel (Professional Horticultural Association Kassel).

We offer the following courses on tree care and rope climbing techniques:

- Rope climbing Level A - B - C
- Tree work / Platform I & II
- PPE expertise / Safety workshop
- Wood biology and tree statics
- European Treeworker

Rope climbing I Platform
